Professional Summary

Frontend-focused Software Developer experienced in building and maintaining production web and mobile applications.

Strong background in clean architecture, scalable system design, and complex business workflows, with hands-on experience integrating APIs and optimizing performance in data-driven systems.

Committed to writing maintainable, high-quality code and collaborating closely with cross-functional teams to deliver reliable, user-centered software solutions.

Technical Skills

Programming Languages

TypeScript · JavaScript · Dart · SQL

Frontend (Web)

React · Next.js · HTML5 · CSS3 · Tailwind

Mobile Development

React Native · Flutter · Google Play Store Deployment · Apple App Store Deployment

Backend

Node.js · Express.js · REST API Design

Databases

MongoDB · PostgreSQL · Oracle Database

Cloud & DevOps

AWS · Google Cloud Platform (GCP) · GitHub Actions · GitLab CI/CD

Architecture & Practices

Clean Architecture · Component-Based Design · Performance Optimization · Scalable Systems · API Contract Validation

Tools

Git · GitHub · Postman · DBeaver · Chrome DevTools · Agile · Jira

Professional Experience

Banana Software S.A.S.

Software Developer

December 2022 – January 2026

- Development and maintenance of production web and mobile applications supporting complex administrative and commercial workflows.
- Designed modular and scalable application layers following clean architecture principles, improving maintainability and reducing unnecessary re-renders and redundant API calls.
- Built advanced data-driven interfaces including dynamic filtering, search, pagination, and robust state management for high-volume datasets.
- Integrated backend services through RESTful API consumption, validating data contracts and handling edge cases to ensure reliability.
- Optimized application performance through targeted refactoring, improved state handling strategies, and efficient rendering patterns.
- Collaborated closely with backend engineers to define API structures, reproduce issues, and refine system interfaces.
- Contributed to architectural discussions aimed at improving long-term scalability, developer experience, and system stability.
- Conducted code reviews and actively participated in the company's recruitment cell, contributing to technical interviews and candidate evaluations.
- Delivered technical demos and product presentations to internal stakeholders.

Key Projects

Commercial Sales Platforms (Web & Tablet)

- Contributed to the development of data-intensive commercial platforms supporting large product catalogs, advanced filtering, search, and server-driven pagination.
- Implemented complex business rules and optimized rendering performance in high-volume usage scenarios.
- Improved usability and responsiveness across tablet and desktop environments.

Mobile Applications – Augmented Reality Commerce

- Developed cross-platform mobile applications enabling augmented reality product visualization in real-world environments.
- Led end-to-end delivery from development through production release, including deployment to Google Play Store and Apple App Store.

- Focused on performance, smooth interactions, and consistent user experience across devices.

Internal Management Platform (Full-Stack)

- Designed and implemented a full-stack internal system to manage employee vacations, payroll documentation, and medical certifications.
- Built role-based access control and integrated scheduling and notification services to streamline internal processes.
- Structured backend and frontend layers to ensure scalability and long-term maintainability.

Corporate Website

- Developed a responsive corporate website with emphasis on performance, accessibility, and cross-browser compatibility.
- Translated design requirements into clean, production-ready frontend implementation.

Education

Technical Degree in Programming - TECLAB

March 2022 – December 2025

Certifications & Training

- Flutter Development Certification - ATC
- Artificial Intelligence Course – Teclab
